NC „Maritime Ports Administration” SA Constanta has the role of port authority for the Romanian Ports - Constanta, Midia and Mangalia (and Tomis Marina). From its position, it aims to provide quality and competitive services to the ports customers, to offer a developed transport infrastructure, as well as security, safety and environmental port conditions, thus encouraging the cargo traffic and transforming the Port of Constanta into an important transit center - by offering the shortest transport alternative to the center of Europe and becoming a regional distribution center - the leader - for its hinterland. The Port of Constanta offers a lot of advantages, among which, the most important are:

- multi-purpose port with modern facilities and sufficient depth to accommodate the largest vessels passing through the Suez Canal;
- direct access to the Pan-European Corridor VII, through the Danube Black Sea Canal, providing a shorter and cheaper waterway transport towards Central Europe than the routes using the Northern Europe ports;
- good connections with all modes of transport: railway, road, river, airway and pipelines;
- the New Container Terminal on Pier II South, increasing the container operating capacity;
- future expansion planned;
- Ro-Ro and Ferry-boat terminals suitable for the development of short sea shipping serving the Black Sea and the Danube countries;
- Since 1st January 2007 the Port of Constanta has become a port with customs facilitations.

In order to meet the traffic requirements, Constanta port is equipped with shore cranes, bulk discharging facilities, gantry cranes, handling platforms for loading bagged and bulk cargo, pneumatic floating cranes, oil handling facilities, as well as specialized operating within quays and terminals.

European and international promotion of Constanta port’s competitive advantages:

- favorable geographic position – Constanta port is connected to the Pan European transport network by corridors IV (road and railway), VII (inland navigation) and TRACECA transport corridor;
- operation facilities for any kind of cargo and storage capacities;
- port services in a competitive environment;
- promotion activities in the Central Europe by the representative offices in Budapest, Belgrade and Vienna.

Constanta Port efficiently serves cargo flows going to or coming from Central and Eastern European countries including: Austria, Bulgaria, Hungary, Moldavia, Slovenia, Slovakia, Ukraine, and former Yugoslavia countries.
Info World is an active participant in the world of cyber security, both by conducting research projects, as well as by taking part in conferences and scientific presentations alongside their partners from the academic and/or corporate environments.

The company’s activity in the medical software field also boasts revolutionary products which satisfy the doctor’s need for communication, mobility and most importantly security. Info World’s software applications are installed on laptops as well as other mobile devices, therefore a particular interest is being manifested on implementing standards for secure communication, access and transfer of medical data.

The recognition and results received by Info World are proof of its relentless work for partners and customers. The company has attained accolades for their constant capacity to learn and implement innovative technologies in delivered products and services.
